

The Hot Tutor

Natalie Reidmann

While walking with friends on campus at the University of Nebraska-Lincoln one day last year, Pre-Med student Natalie Reidmann caught the eye of a Hollywood casting agent. He was looking for just the right person to take on the highly challenging task of tutoring Motley Crue drummer Tommy Lee for NBC's new reality show, "Tommy Lee Goes to College."

Natalie was cast quite appropriately as the "Hot Tutor." She was given the job not only for her sweet personality and sexy looks, but also for her commitment to academic achievement. She was determined to teach Tommy to take college seriously, hit the books and get passing grades for the few months he attended UNL.

She did a stellar job of helping Tommy study while gently coaxing him to keep focused, keep his eyes on the books and keep his mind on the subject at hand. Ultimately, her soft smile and oozing sex appeal proved to be a little too much for Tommy's neurons. In the end, he failed Chemistry and barely passed his other classes, but that can't be blamed on Natalie.

Her successes are numerous. Natalie was on the Dean's List every semester of her four years at UNL. She was a teaching assistant in both the chemistry and psychology departments and a neuroscience research assistant in the UNL Behavioral Center. She is also a registered Emergency Medical Technician and was a runner up and winner of the swimsuit competition at the 2005 Miss Nebraska USA Pageant. Natalie is involved in many volunteer and charity

projects, such as St. Jude Children's Research Hospital UNL campus coordinator. She volunteers her time to causes close to her heart; The Nebraska Aids Walk, American Red Cross, Relay for Life, The Lighthouse, Breast Cancer Research and the Make-a-Wish Foundation.

In May, Natalie graduated from UNL with Honors as a Superior Scholar, graduating in the top three percent of her college. She received her degree in Psychology-Humanities in Medicine Program- Pre-Medicine. She is now attending Medical School at The University of Nebraska Medical Center.

We bet the med school guys are lining up to ask Natalie to do just one more tutoring gig. Chemistry after all, is what it's all about.
